About the Elk River Alliance

The E.R.A. exists to promote a new era in watershed thinking where well managed human activities result in healthy ecosystems and a robust economy. ERA uses education and outreach programs that raise watershed literacy, informs sustainable water decision-making and collects science to prioritize community involvement that protects, enhances and restores aquatic ecosystems.

We Want a Waste-Free Weekend

We are really working hard to make this a waste-free event. As such, we are providing everyone with a mug included in the price. Please bring your own cutlery if you can (we will have some on hand). We will also have washing/rinsing facilities available to clean your dinner/silverware.
